Paperfox MP-1 Press Instructions Manual

Accessories delivered with the MP-1 paper punch

With the Paperfox MP-1 paper punch are the following parts delivered:

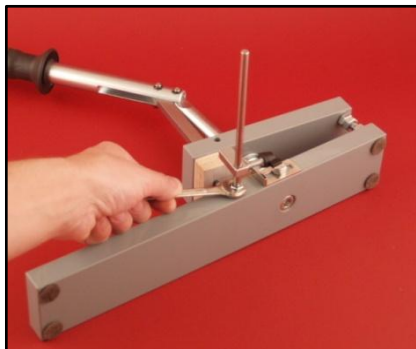

Assembling the Paperfox MP-1 paper punch

Unpack the paper punch and assemble it.

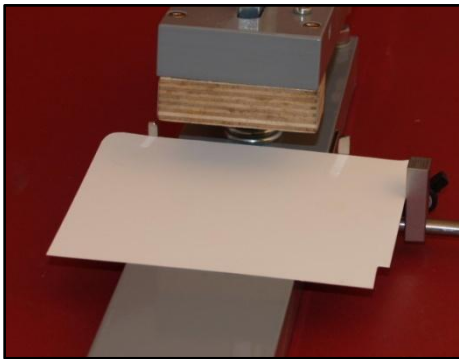

Mount the back paper stops with two M6x10 screws and washers on the paper punch. Use a 10mm wrench to fix the screws.

Mount the side paper stop on the paper punch. Use the M6 washer. Fix it with 10mm wrench. (You can mount the side paper stop to any side of the paper punch)

Now the paper punch is ready to use.

Using the Paperfox MP-1 Paper punch

Set the position of the paper stops so that when you set the side of the sheet to this paper stops the paper punch should punch the hole in the proper position. For special tasks you can use special paper stops.

Faults an solutions

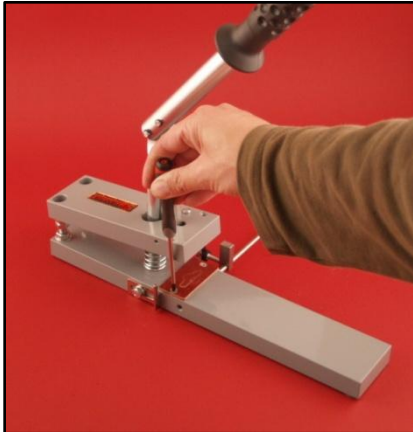

After longer usage the cutting plate and the tool can be wear out. You should replace them.

Replacing the tool

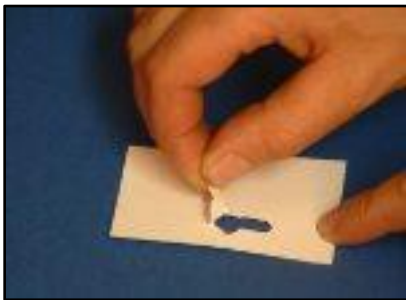

The tool (usually EP-1 euro slot tool) can be changed after removing the 2 pcs 3,5x35mm screws.

Replacing the cutting plate

The VMP-1 cutting plate fixed with two screws into the MP-1 paper punch. You can replace the cutting plate after removing these screws. You can use both side of the VMP-1 cutting plate.

Setting the parallelism

After longer usage or especially after changing the tool maybe that the machine don't cuts in the same way the whole shape which you want to cut. A part of the shape was cut well, but the other side not. In this case the setting of the parallelism of the machine can help.

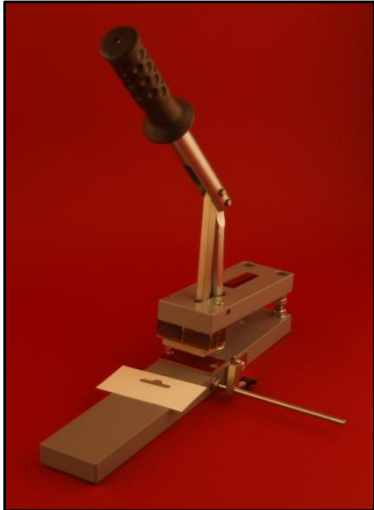

Release the female screw of the M8 setting screws at the back of the machine, set the parallelism and fix the screw again.
